Cust. Acquisition

- Marketing & client acquisition
- Onboarding & administration
- Relations & support

Asset Research

- Policy/product development
- Asset selection, sourcing & due diligence

Execution

- Investment Decision
- Trend-based portfolio management
- Financing & exit

Monitoring

- Customer guidance and engagement
- Risk & operational productivity management

Support Tasks

- Legal & compliance
- Performance & data management
- Asset & Fund administration

Key Drivers

Revenue Drivers	Cost Drivers	Growth Drivers
Investment Mgmt. Fee (85%)	Financial Charges (25%)	Investment performance
Advisory Services Fee (2%)	Employee Compensation (25%)	Market positioning
Interest & Dividend Income (5%)	Selling & Distribution (10%)	Distribution excellence

Key Segments

Source-based	Investment-based	Sector-wise
Corporates (43%)	Debt/Income Funds (48%)	Private (77.7%)
HNIs (34.6%)	Equity/Growth Funds (30%)	Public- UTI (5.5%)
Retail Investors (21%)	Hybrid (13.5%)	Public- Others (16.8%)

Top Players

Name	Market Share (%)	AUM (USD Bn)
SBI	14%	53.4
HDFC	13.7%	52.2
ICICI Prudential	13.3%	51.0
Aditya Birla Sun Life	9.2%	35.4

Market Trends

- **Industry Size:** The total industry AUM is poised to grow from \$390 Bn to \$700 Bn in 2020-2025
- **Industry Structure:** 83% of total AUM is accounted by top 10 AMCs driven by investments in equity & hybrid funds
- **Future drivers:** Simplified processes, outreach beyond tier 1 cities & deeper saving wallet penetration
- **Challenges:** Cybersecurity, tackling risk aversion, shrinking margins, mobilizing FII investments

Key Drivers

Revenue Drivers	Cost Drivers	Growth Drivers
Automobile sales	Raw Materials	Govt. support policy
After-sale service	Labour	Increasing exports
Financing services	Advertising	High Investment (5% of total FDI inflows)

Key Segments

Segments	Market Share	KPIs
Two-wheeler	80.9%	Production volume
Three-wheeler	3%	Avg. Prod. Downtime
Passenger vehicles	12.9%	Inventory turnover
Commercial vehicles	3.3%	Mfg. cycle time

Top Players

Name	Market Share (Key Segments)	Market Capitalization (INR Cr)
Maruti Suzuki	51% (passenger)	217,240
Bajaj Auto	64% (3-wheeler)	83,398
Hero MotoCorp	36% (2-wheeler)	58,221
Tata Motors	44% (Commercial)	45,639

Market Trends

- Industry size:** India is the 5th largest Auto market with 3.81 million units sold in 2019; industry expected to reach **Rs 16-18 lakh crores** by 2026
- Exports:** 47.7 lakh units in FY20, CAGR of 6.94% (FY16-FY20)
- Electric Vehicles:** Market estimated to be a **Rs 50,000 crore** opportunity by 2025
- Expanding R&D hub:** India accounts for 40% of global engineering and R&D spend. 8% country R&D spend in the sector

Marketing	Sales	Products			Transactions
- Advertising - Branding - Sales Support	- Acquisition - Offering - Multi-channel management	Funding - Deposits - Securitization - Credits	Investment - Credits - Securities	Services - Account Mgmt - Asset Mgmt - Issuance/IPO	- Payment - Trading - Clearing and Settlement - Custody

 Key Drivers			 Key Segments

Raw Material	Iron Production	Steel Production	SCM/Logistics	Sales
- Extraction of iron ore from taconite rocks - Creating coke from coal to fuel furnaces - Alternative: Buying	Blast Furnace: Pellets of iron ore, carbon fuel & limestone with superheated air form iron in molten state	Oxygen Furnace: Steel scrap, molten iron & high purity oxygen are used in formation of steel	- Demand Planning - Service & Delivery Performance - Outbound Logistics	- Pricing of all products - Sales team efficacy - Key a/c management - Customer Service - Support Tools

 Key Drivers			 Industry Dynamics		
Revenue Drivers	Cost Drivers	Capex Drivers	Segments	KPIs	Growth Drivers
Steel for Construction	Raw Material Cost (45%)	Plant & Machinery (70%)	Infrastructure	EDITDA/tonne	Growing Demand in all sectors
Steel for Railway Parts	Power & Fuel (10%)	Land including roads (20%)	Construction	Capacity Utilisation	Policy support
Sale of Semis & By-Products	Salaries & Wages (5%)	Buildings (10%)	Automotive	Crude Steel Production/ROI/OEE	Increasing investments

 Top Players			 Market Trends	
Name	Market share (by capacity)	Market Capitalization (USD Bn)	Industry Growth: Expected expansion of 250% over the next 11 years (Expected CAGR: 8.69%) as per National Steel Policy, 2017 Growth in Per Capita Steel Consumption: Low per capita steel consumption with a strong expected rise fueling growth Increasing Investment: Ongoing consolidation of companies & increased FDI is an opportunity for both global & domestic players Innovation: Government directive to increase R&D projects by spending at least 1% of the sales turnover to facilitate innovation Import: Steel Scrap Recycling Policy to reduce import. GOI increased import duties by 5% & imposed anti-dumping policies. Export: 30% duty imposed on export of iron ore to promote supply to domestic companies	
JSW Steel	21.92%	9.37		
Tata Steel	15.68%	6.25		
SAIL	13.38%	2.16		
Jindal Steel	8.6%	2.72		

Ops. Setup	Cust. Acquisition	CRM	Service Delivery	After-sales service
- Infrastructure setup - Talent Acquisition - Employee Training - Talent Retention - Visa Handling	- Pitching and acquiring new clients - Cross-selling products to existing clients	- Understanding client requirements - Communicating it to software team - Conflict resolution	- Product development - Live testing at client's end - Bug fixes - Full deployment	- Provide software updates and IT support - Maintain relationship for repeat business

 Key Drivers			 Industry Dynamics		
Revenue Drivers	Cost Drivers	Capex Drivers	Segments	KPIs	Growth Drivers
Contract/Service Fee	Employee Salaries (62%)	Office space (Lease/Owned)	IT Services (51.4%)	Total Active Clients	National Policy on Software Products
Software sales / Software as a Service	Admin Costs (13%)	Computer Systems	Software Products (20%)	Total Contract Value	Growth in domestic demand
Hardware Leasing / Cloud Infrastructure	Other Expenses (25%)	Other office utilities and assets	ITeS/BPO (19.7%)	Attrition Rate and Bench strength	Global demand for cybersecurity services

 Top Players			 Market Trends	
Name	Revenue market share	Market Capitalization (USD Bn)	- Indian IT industry's size stood at \$177 bn with \$136 bn exports in FY19. Its expected to grow to \$350 bn by 2025 - Major customer segments: BFSI, Telecom, Retail, Healthcare, Mfg. - Emerging technologies: AI, ML, Cloud Computing, blockchain - AI & ML to contribute \$1 trillion to Indian economy by 2035 - Work from home culture to provide growth opportunities - Challenges: Employee retention, US Visa regulations (H1-B visas), export dependency, investments in data security	
Tata Consulting services	11.8%	113		
Infosys	6.7%	54		
HCL	5.1%	26		
Wipro	4.6%	21		

Key Drivers

Revenue Drivers	Cost Drivers	Growth Drivers
Domestic transportation	Transportation	Simplified freight policy
Import & Export	Warehousing	Increasing road connectivity
Value Added Services (E.g. faster delivery)	Labour	Increasing railway and air networks

Top Players

Company	Segment	Market Capitalization (INR Cr)
CONCOR	Multi-modal	22,808
Blue-Dart	Courier Delivery	6,173
Transport Corp. of India	Multi-modal	1,622
VRL Logistics	Parcel & priority delivery services	1,405

Industry Dynamics

Segments	Market Share	KPIs
Road	59%	Time to delivery
Rail	35%	Average cost to order
Waterways	6%	Warehouse capacity
Air	1%	Avg. inventory

Market Trends

- Industry size:** Indian logistics sector is valued at **Rs 11.75 lakh crores**; forecasted to grow at CAGR **10.5%** (2019-25)
- Rank:** India's rank has gone up from 54 in 2014 to **44 in 2018** in the World Bank's LP Index (overall logistics performance)
- Improved connectivity:** Sagarmala, Bharatmala, & UDAN projects aimed at improving connectivity and reach, greater opportunities
- Warehouse Automation:** Market valued at **Rs 20,200 crores**; evolution of technologies like AI, IoT and Blockchain

Exploration	Production	Transportation	Storage	Marketing
- Identification of on-shore/off-shore site - Seismic surveys to assess potential - Develop suitable FDP	- Project sanctioning - Create infrastructure - Strike 'First Oil' - Platform at sea to split oil, gas & water	- Crude: Transported by oil (super) tankers - Gas: Liquified gas is transferred to plant terminal	- Crude: Storage at ports in large tanks - Gas: Preserved in reservoirs (artificial or natural)	- Refines raw material: Petrol, Diesel & LPG - Distil & convert by BP - Products marketed via B2B & B2C channels

 Key Drivers			 Industry Dynamics		
Revenue Drivers	Cost Drivers	Capex Drivers	Segments	KPIs	Growth Drivers
Crude Oil (75%)	Raw Materials Consumed (92.5%)	Plant & Machinery (85%)	Transportation	E&P Output	Economic growth
Natural Gas (20%)	Transportation (4%)	Buildings & Roads (8%)	Heating & Energy	Capital Project Efficiency	Technological advancements
Others (5%)	Employee Benefit Expenses (3.5%)	Land & Producing properties (7%)	Chemicals, Plastics, Fertilisers & Others	Lease Operating Expense (LOE)	Petrochemical products

 Top Players			 Market Trends	
Name	Market share (by crude refining capacity)	Market Capitalization (USD Bn)	India's Energy Demand: Expected to double to 1516 Mtoe by 2035 (CAGR ~4% against worldwide CAGR ~1% over 18 years) on growth in transportation, aviation, road construction & LPG usage Petroleum Products: Expected to grow at CAGR ~6% over 5 years Diesel Demand: Expected to double to 163MT by 2029-30 Industry: Expected investment-\$25Bn in exploration & production Govt. Policy: OALP & CBM to help increase investments; 100% FDI allowed in upstream & private sector refining companies.

Drug sales	R&D	Increasing fatal diseases	Generic drugs	\$14B	24%
Licensing of patents	Distribution	Health insurance permeation	OTC Drugs	\$4.2B	12.9%
Insurance premiums	Promotion/Marketing	Growing stress-related diseases	Patented Drugs	\$1.8B	12.9%

 Top Players			 Market Trends	
Name	Market Share	Market Capitalization (INR Cr)	Industry Size: The Indian market is expected to expand at a CAGR of 22% over 2015–20 to reach US \$55 Bn Consolidation: 100% FDI allowed under automatic route; high chances of inflow of funds materializing in M&A opportunities Investments: Increasing private sector investments in R&D and acquisitions are driving the sector's growth. Decline in R&D Investment: Companies invested ~8% of their sales in R&D showing a decline from previous year	
Sun Pharma	8.4%	93,211		
Aurobindo Pharma	5.65%	30,425		
Lupin	4.73%	30,015		
Cipla	4.73%	33,978		

Sourcing	Inbound Logistics	Inventory	Outbound Logistics	In-store Operations
- Vendor management - Demand forecasting - Price and trend forecasting	- Network optimization - Carrier provider - Cold chain management	- Storage and warehousing - Allotment and scheduling to stores - Merchandise analysis	- Channels of transport - Route analysis	- In-store replenishment - Discounting policy - Salesforce management - Loyalty programs

Key Drivers

Revenue Drivers	Cost Drivers	Growth Drivers
Own brand (label) sales	Retail lease	Use of plastic money
Loyalty and reward programs	Stock in trade	Shift to luxury goods
Cross-selling	Credit card fees	Rising income levels

Industry Dynamics

Segments	Market Share	KPIs
Electronics	42.5%	Conversion rate
Apparel/ lifestyle	27.5%	Sales per sq. ft.
Home & living	6%	Avg. transaction value
Food & grocery	2.5%	Shopper dwell time

Top Players

Company	Major Brands	Market Capitalization (INR Cr)
Avenue Supermarts	D Mart, D Mart Minimax, D Homes	91,150
Future Retail	Big Bazaar, FBB, Easyday, WH Smith	19,272
Aditya Birla Fashion	Pantaloons, Louis Phillipe, Van Huesen	15,462
Trent	Westside, Star Bazaar, Landmark	14,721

Market Trends

- Industry size:** Indian retail sector valued at Rs ~70 lakh crores; expected to reach ~120 lakh crores at 11% CAGR (2019-26). It accounts for 8% of India's employment and 10% of its GDP
- Rank:** India is the world's 5th largest global destination
- Foreign inflows:** 100% FDI is now allowed in single-brand retail trading and 51% in multi-brand retailing
- Channel split:** Online retail sales account for 23% of organized retail market (which itself accounts for ~10% of overall market)

Tower Infrastructure	Network Equipment	Device Manufacturers	Network Operators	Customer
- Infrastructure Sharing - Tower Deployment and Operations - Energy Management	- Switches, Routers, Firewalls - Network consulting - Integration & Deployment - Support, Maintenance	- Build mobile phones, handsets which are used by consumers - Tech and chip makers develop tech and hardware	- Provide telecom services: - Voice - Messaging - Internet - Value Added Services	- Recharge Plans - Customer Care Centres - Engagement through online and offline advertising

Key Drivers

Revenue Drivers	Cost Drivers	Growth Drivers
Telephone services	Spectrum auctions	Mobile Penetration
Internet services	Network investments	Increasing internet users
Network connectivity to other telco firms	Operating expenditure	Untapped rural market (58% rural density)

Industry Dynamics

Segments	Market Share	KPIs
Wired	1.72%	Call Completion Ratio Average Call Duration
Wireless	98.28%	Dropped call percent Idle time on network

Top Players

Operator	Market Share	Market Capitalization (INR Cr)
Reliance Jio	33.85%	4.9 lakh
Bharti Airtel	28.06%	2.8 lakh
Vodafone Idea	27.37%	12,068
BSNL	10.43%	70,746 (assets)

Market Trends

- Subscriber base:** India has the 2nd largest telecom network globally; ~117 crores (CAGR 2.7%) subscribers as on Apr 2020
- Internet users:** India has the second highest number of Internet users globally; 53 Cr users in 2018 with increase of 6.5Cr/year
- Data usage:** India has the highest data usage/smartphone with an average usage of 9.8GB per month
- Trends:** segregation of tower assets to separate companies (Tower industry), Green Telecom, tech: 5G, cloud computing, AI

Appendices

IIM A Consulting Primer 2020-2021

What is Consulting?

- Giving external advice to organizations that may require special or technical expertise or an outside perspective on their business problems, performance improvement etc.
- Consultants are “**problem solvers for hire**”
- They use a multi-pronged approach, involving primary and secondary research combined with business intuition from their extensive experience in the industry to understand business problems and provide recommendations
- In summary, it is helping CEOs and other leaders solve pertinent business problems and implement solutions

Key service areas

Strategy Consulting: corporate strategy, economic policy, mergers and acquisitions, organizational and functional strategy form a part of this area

Operations Consulting: includes process and project management, supply chain, procurement, outsourcing etc.

Human Resources: Includes organizational change, Learning and development, HR Technology, benefits and rewards, talent management

Financial Advisory: includes consultation on corporate finance, actuarial valuation, corporate restructuring, risk management, forensic audits etc.

Tech Consulting: Implementation of ERP, advisory related to IT, data analytics, cyber security, system integration etc., fall under this area

Why join consulting?

Intellectually rewarding

- Solving large scale business problems in a structured way
- Steep learning curve
- High ownership of work
- Soft skills development

Diversity in work

- Work in various sectors/industry in initial years
- Type of project – performance improvement, market entry, growth etc.

Collegial work environment

- People of similar age group from different academic/professional backgrounds

Good pay and perks

- The pay is good and the lifestyle is glamorous

Lucrative exit options

- Corporates (general management/leadership)
- Private Equity/Venture Capital
- Entrepreneurship
- Public Policy

But, be prepared for...

Travel: Travelling every week may not suit everyone, specially for those who live with their families, spouses etc., being away from home for 5 days a week may be difficult

Also, travel may sometimes be to client locations in remote areas, which may be cumbersome

Rigorous work and long hours:

Consultants spend a lot of hours working, sometimes averaging more than 12 hours a day, depending on client deadlines

Work can sometimes be stressful, consultants are often thrown into the deep end with minimal training and they learn on the job.

A consultant's calendar (typically)

Typical work dynamics

Hiring process

What are they looking for

Career Progression (typically)

Steps to problem solving (an example)

Project – Increase sales through market expansion for a yarn manufacturing company

Emerging trends in consulting

Implementation projects: There is an increase in the number of implementation projects for firms. Clients are focussing more on outputs rather than inputs

Technological advancements: Technology is changing the consulting landscape. Consultants are expected to understand and implement the state-of-art-technology in various fields

Increasing specialization: There is an increase in the specialization, hyperspecialization in services as well as market segment owing to sophisticated client demandsn

Risk-based consulting: Increase in projects where there is a shared risk of the firm with the client. Hitherto, client carried the majority of the risk of any project which is shifting to consulting firms

Internal consulting: Many companies are creating in-house strategy and consulting teams. This has increased the competition in the industry and a downward pressure on billing rates. Clients are looking for more value addition and focussing on output generation

Strengthening
your toolkit

Framework glossary (1/3)

A glossary of some of the most popular frameworks helpful in structuring solutions in case interviews.

Business Situation Framework (3C's or 3C & P)

Used for assessing the firm's current position, or for evaluating the market for a new product, market entry, growth etc.

Customers	What are the market segments, what is the consumer's behaviour, their values, demographics etc. Identifying target customers.
Competition	What is the size of the market, market share, how are competitors performing, their likely behaviour in the future etc.
Company	What are the firm's goals, and what strategy has it employed to achieve them? What are its competencies?
Product	What is the nature of the firm's product or service? Does it meet the customers' requirements? Substitutes and complements?

Marketing Mix Framework (4P's & 7P's)

Used for identifying the value stemming from a product's offering in the market by combining various factors.

Product	What value does the product offer the client? What are its attributes? How does it measure up when compared with competitors?
Place	What is the distribution channel for the product (retail, wholesale, online etc)? Are the locations of the client's outlets appropriate?
Promotion	What marketing message should the client deliver? Are discounts, coupons, special offers etc. relevant for the product or service?
Price	How much is the client charging? How price sensitive are the customers, and how are competitors pricing similar products?

For analysing a service instead of a product, the mix can be expanded to include the following 3P's.

Physical Evi.	Is the service intangible? What cues does the customer have to understand the benefit of the service?
People	Who are the people delivering the service (ex. waiters, cooks, receptionists for a restaurant)? What are their capabilities?
Process	What are the protocols in place to ensure quality in the service? Processes convey the image of dependability for a service.

Profitability Framework (Profit Equation)

The good old "Profits = Revenues – Costs" framework, used for identifying factors influencing profits and profitability.

Revenues	Average Price × No. of Units Sold Capacity × Occupancy % × Average Price No. of Customers × Frequency × Ticket Size etc.
Costs	Can be classified into fixed and variable, and then analysed further. (Some long-term variable costs can be fixed in the short term)

Framework glossary (1/3)

A glossary of some of the most popular frameworks helpful in structuring solutions in case interviews.

Value Chain Analysis

This framework lays down the series of activities that the firm employs to deliver a good or service

Inbound Logistics	The process of sourcing and warehousing raw materials, and transporting them to where they are needed.
Operations	The core function of the company where the bulk of value addition happens (varies from manufacturing to data processing).
Outbound Logistics	The delivery of the product or service to the customer. Used to analyse distribution channels (retail/wholesale/agents etc.).
Marketing and Sales	Activities used to promote the product. Can include advertisement, promotional offers and also market research.
Servicing	Any of the ancillary services that assist in the main value chain, including customer care, and after sales services.

Mergers & Acquisitions Framework

This framework can be used to analyse the viability of a merger with a target firm

Stand-alone Value	Value of target firm independent of client's firm. Consider tangible and intangible factors (ex. revenues and brand value).
Synergy	How do the capabilities of both target and client's firm synergise together?
Other Factors	Literally, just a bucket for other factors. (Read: regulatory hurdles, culture clashes etc.)

Smaller Frameworks

These frameworks work well within larger structures, useful for when you're drilling down into a specific bucket of analysis

Internal/External	What factors affect the scenario within the company, and from the environment (market conditions, competition etc.)
Qualitative/Quantitative	What factors can you quantify (revenues, costs), and what factors do you need to describe (marketing strategies)?
Costs/Benefits	What are the advantages and disadvantages; pros and cons that must be evaluated before making a recommendation?

Framework glossary (1/3)

A glossary of some of the most popular frameworks helpful in structuring solutions in case interviews.

McKinsey's 7S Framework

The 7S Framework is useful for analysing the alignment of a firm to the achievement of its goals. These are the "3 Hard S's"

Strategy	How does the firm intend to achieve its goals? What is its unique selling proposition? How does the firm create value?
Structure	Organisation of departments within the firm (functional/divisional), structure of teams, and hierarchy. How do they coordinate?
Systems	What are the protocols in place? (Similar to 'process' for the 7P framework). How does the firm evaluate progress?

And the "4 Soft S's"

Shared Values	What are the firm's values and culture? How strong are they, do they influence the employees, do they need to be reinforced?
Skills	What are the skills of the firm's employees? Are there any gaps in the skills required? How are skills assessed and developed?
Style	What style of management or leadership has the firm adopted? Is it appropriate in the context? Do teams cooperate or compete?
Staff	What are the positions within the firm? What positions need to be filled?

Porter's Five Forces

BCG's Growth Share Matrix

Datasheets (1/2)

A compilation of data that will be useful for solving guesstimates. Most of these numbers are approximations, but they should be good enough for a guesstimate scenario.

Table 1: Population Distribution in India (Gender and Urban-Rural)

Total Population	1200
Males	620
Females	580
Sex Ratio	0.95*
Urban Population	350 (30%)
Rural Population	850 (70%)

Figures are in millions

* 950 females for 1000 males

Table 2: Life Expectancy and Population Growth Statistics

Overall Expectancy	69 Years
Male Expectancy	67 Years
Female Expectancy	73 Years
Birth Rate	22*
Death Rate	7.5*
Pop. Growth Rate	1.25%

* Figures are for every 1000 individuals

Table 3: Age-Wise Break-up of Population

Age Spread	Population (%)
0-14 Years	350 (30%)
15-24 Years	250 (20%)
25-34 Years	200 (15%)
35-44 Years	150 (10%)
45-54 Years	150 (10%)
55+ Years	150 (10%)

Figures are in millions

Note: Median age for India is 25 (50% of Indians are below 25, 65% are below 35)

Table 4: Income and Expenditure

Data Head	India	Urban	Rural
Size of Household	5	5	5
Annual Household Income	75,000	1,00,000	50,000
% Savings	-	30%	20%
Expenses (Food)	50%	45%	55%
Expenses (Travel)	10%	10%	10%
Expenses (Others)	40%	45%	35%

Poverty: Approx. 25% of the population lives below the poverty line (\$1.25 or ₹75)

Table 5: Class Distribution by Annual Household Income

Annual Income of Household	Percentage
Low Income (Household Income < 45,000)	20%
Middle Income (45,000 to 1,80,000)	60%
High Income (Household Income > 1,80,000)	20%

Table 6: Demographics by Religion

Religion	Hindu	Muslim	Christian	Others
Population	80%	15%	2%	3%

Datasheets (I/2)

A compilation of data that will be useful for solving guesstimates. Most of these numbers are approximations, but they should be good enough for a guesstimate scenario.

Table 7: Population Spread of Metros

City	Population	City	Population
1. Mumbai	12.5	6. Ahmedabad	6
2. Delhi	11	7. Kolkata	5
3. Bangalore	8.5	8. Surat	4.5
4. Hyderabad	7	9. Pune	3
5. Chennai	7	10. Jaipur	3

Figures are in millions

- Population of top 10 Cities: 66 Million
- Population of next 50 Cities: 66 Million
- Population of next 100 Cities: 45 Million

Table 8: Sector-wise Employment Distribution

Sector	India (%)	Urban (%)	Rural (%)
Agriculture	40%	5%	60%
Industries	10%	20%	5%
Services	50%	75%	35%

Illustrative evaluation metrics

A breakup of what firms generally look for when they evaluate a case interview. This **indicative** list should also help you provide meaningful feedback to your peers as you prepare in groups

Preliminary questions & recap

Illustrative 5-point scale for 'Preliminary questions & recap' (to give a broad understanding of evaluation parameters)

MECE structuring

Problem solving approach

Synthesis / Recommendations

Business insights

Creativity

Communication skills

1. Candidate does not clarify problem statement (no recap of initial information)
2. Candidate clarifies with problem statement with too much detail (no prioritizing of important information)
3. Candidate recaps the problem statement but without sufficient structure; candidate asks for detailed information too early
4. Candidate recaps the problem statement and covers key points but does not display comprehensive understanding of client
5. Candidate provides a concise and structured recap of the problem statement, and asks a couple of relevant clarifying questions

We would like to take this opportunity to thank the following people for their contribution to the cases and guesstimates through submissions made to the club:

PGP 2019-21

Akash Shukla, Anirudh Swaminathan, Anmol Rai, Archit Taluka, Arushi Poddar, Ashutosh Rungta, Darpan Jain, Dhavala V S Aditya, R Rathna Kumar, Raghav Gupta, Rao Aditya Vikram Singh, Revati Rajput, Shray Sibal, Shubham Agarwal, Shubham Singhal, Soham Dutta, Srishti Bhageria, Suganda Sharma, Vaishak P

PGP 2020-22

Abhishek Goyal, Akhil V A, Kanvar Singh Kohli, Rusheen Rathore, Shashwat Gupta, Shivli Agarwal, Sidra Sadaf, Srishti Jain

Through their brilliant submissions, they have helped make the Case Book exhaustive and relevant for all readers.

All the best!
